

DROP BOX SOLID WASTE SERVICE

In February 2015, the Anacortes City Council authorized the mayor and staff to take steps to provide in-house drop box solid waste service. Drop box [or “roll on roll off” as it is sometimes called] is the largest solid waste container size currently available.

Our new roll on truck recently arrived, and we have trained drivers to operate the truck. The containers have arrived and are ready to be delivered. Notices will go out to existing customers shortly.

The city will begin providing drop box service on October 1, 2015.
